EDUCATION

OCT 2020 - SEPT 2025

Berlin-Weißensee Art Academy (KHB)
Bachelor Visual Communication

APR - AUG 2023

Kyoto University of the Arts (KUA)
Exchange Semester

OCT 2019 - JUL 2020

Humboldt-University Berlin (HU)
Philosophy and Art History

JUL 2023 - SEPT 2025

**Scholarship holder of Studienstiftung
des deutschen Volkes**

EXPERIENCE

OCT 2024 - JAN 2025

Moniteurs GmbH

Internship in wayfinding and graphics for clients
incl. Zurich Airport, Merck Group, Grün Berlin

FEB 2025 - ONGOING

Muehlhausmoers corporate communications
Graphic design and motion graphics

SEP 2025 - ONGOING

Schinkel Pavillon e.V.

Gallery oversight and art mediation

2022 - ONGOING

Freelance Graphic- und Web-Design, Animation

Work contributed for The Wrong Biennale, P14 Volksbühne,
TÜV, Münchner Kammerspiele, Bankenfachverband

SKILLS

Graphic- and Web Design

(Adobe Suite, Figma, Javascript, HTML/CSS)

Motion- and 3D-Design, Video Editing

(AfterEffects, C4D, Blender, TouchDesigner)

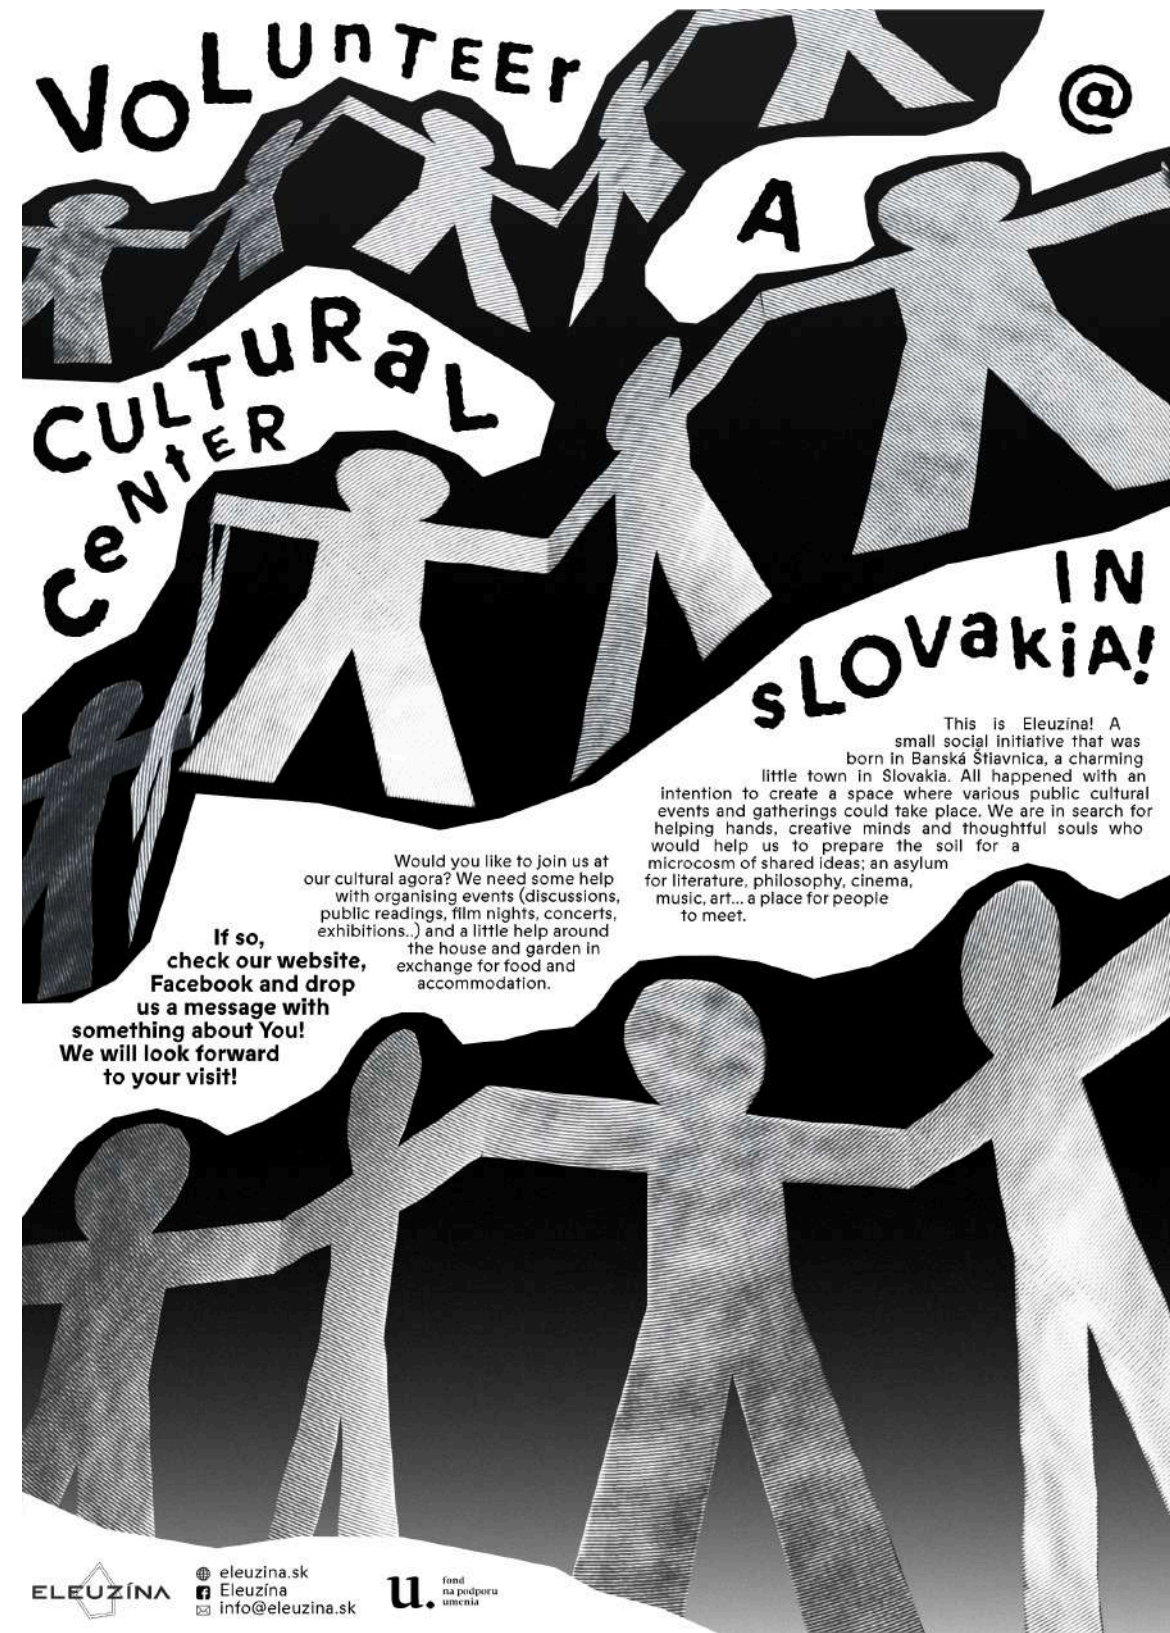

Language Skills

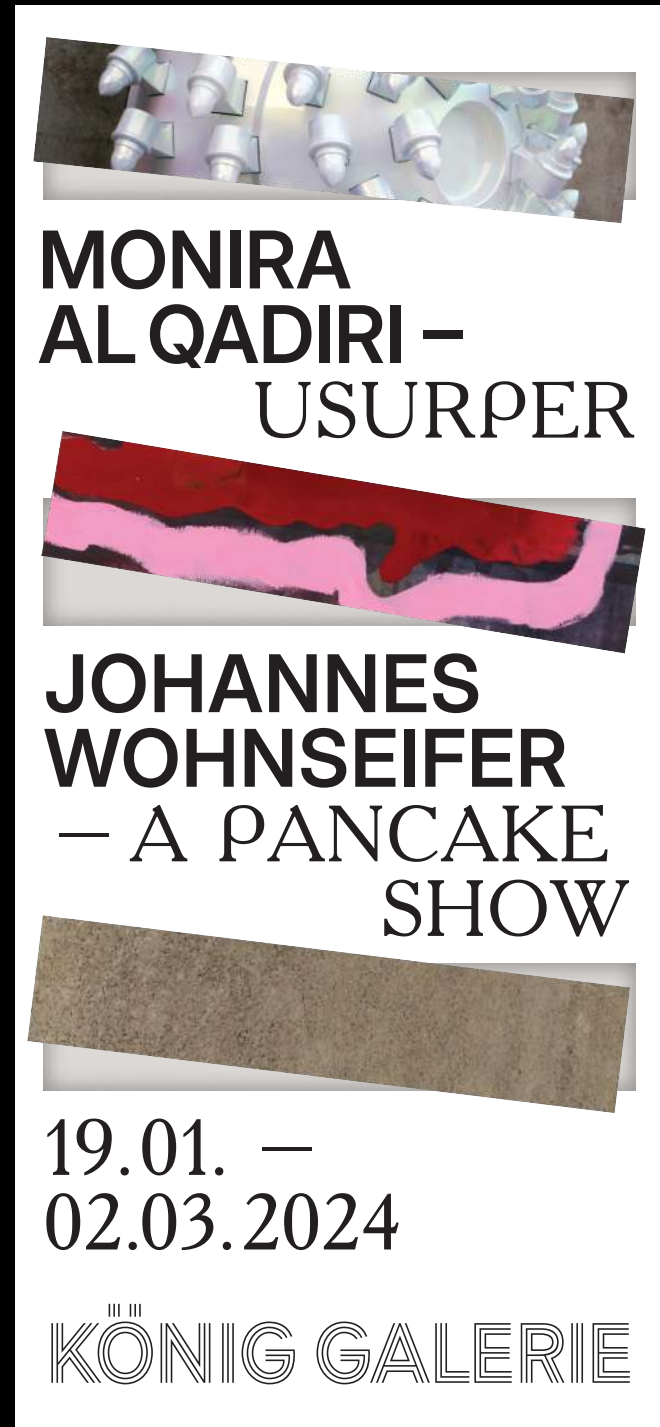

German (Native), English (fluent),
Japanese (B2), French (A2)

KC Eleuzína

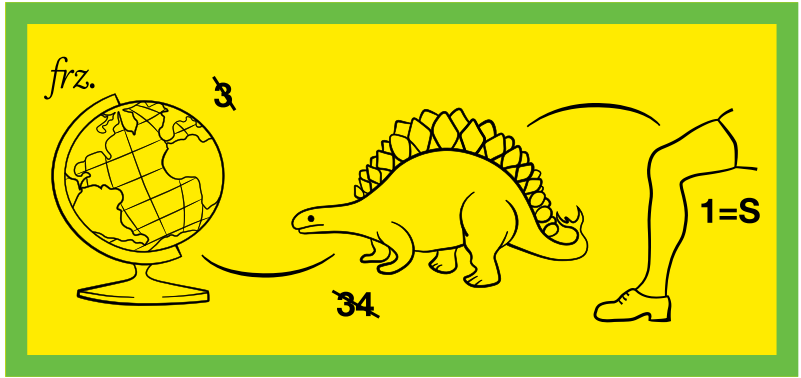

Poster series for events of
the Slovak cultural center
Eleuzína (2019), merging
analog and CGI elements.

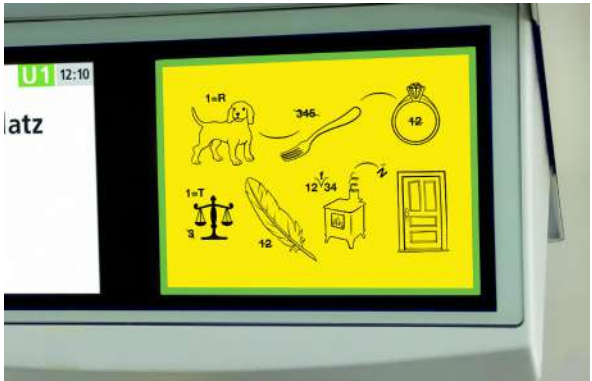

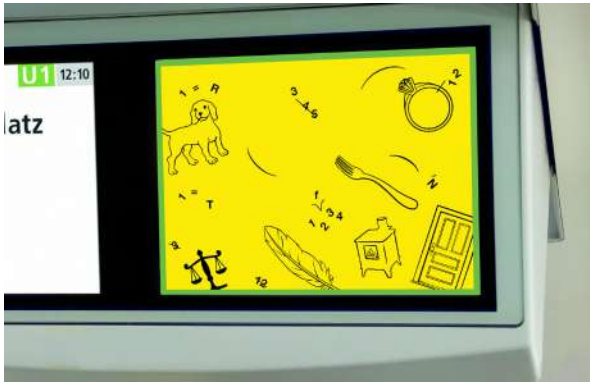

Pitch for Exhibition Flyers

Two variations of a pitch for an exhibition flyer design, designed for a job interview for an undisclosed Berlin gallery.

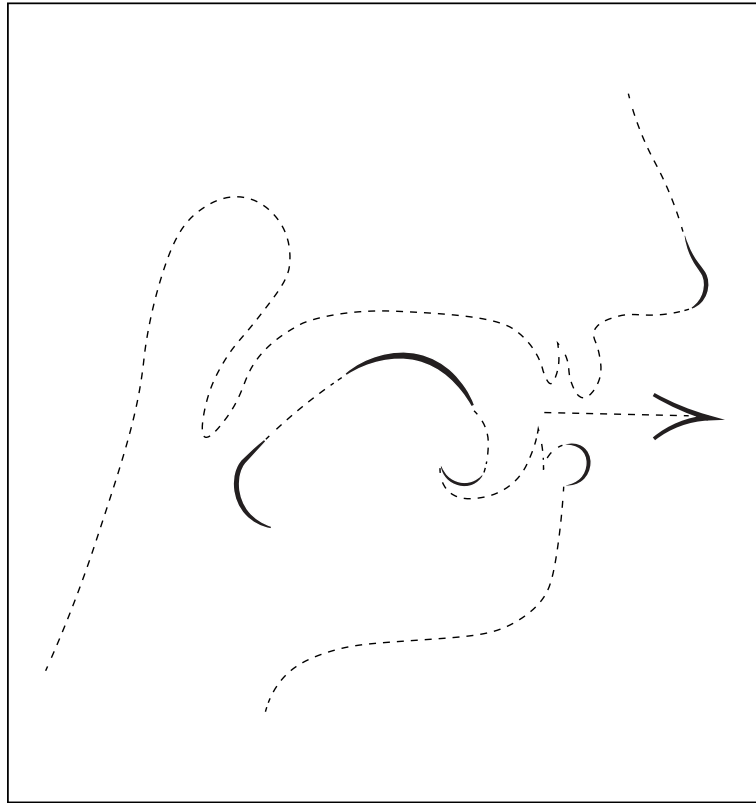

KHB Rundgang Competition

Entry for 2024's competition to design the poster for the open days of the weißensee kunsthochschule berlin, employing rebuses as a way to engage viewers. It won 3rd place in the competition.

Getting Out

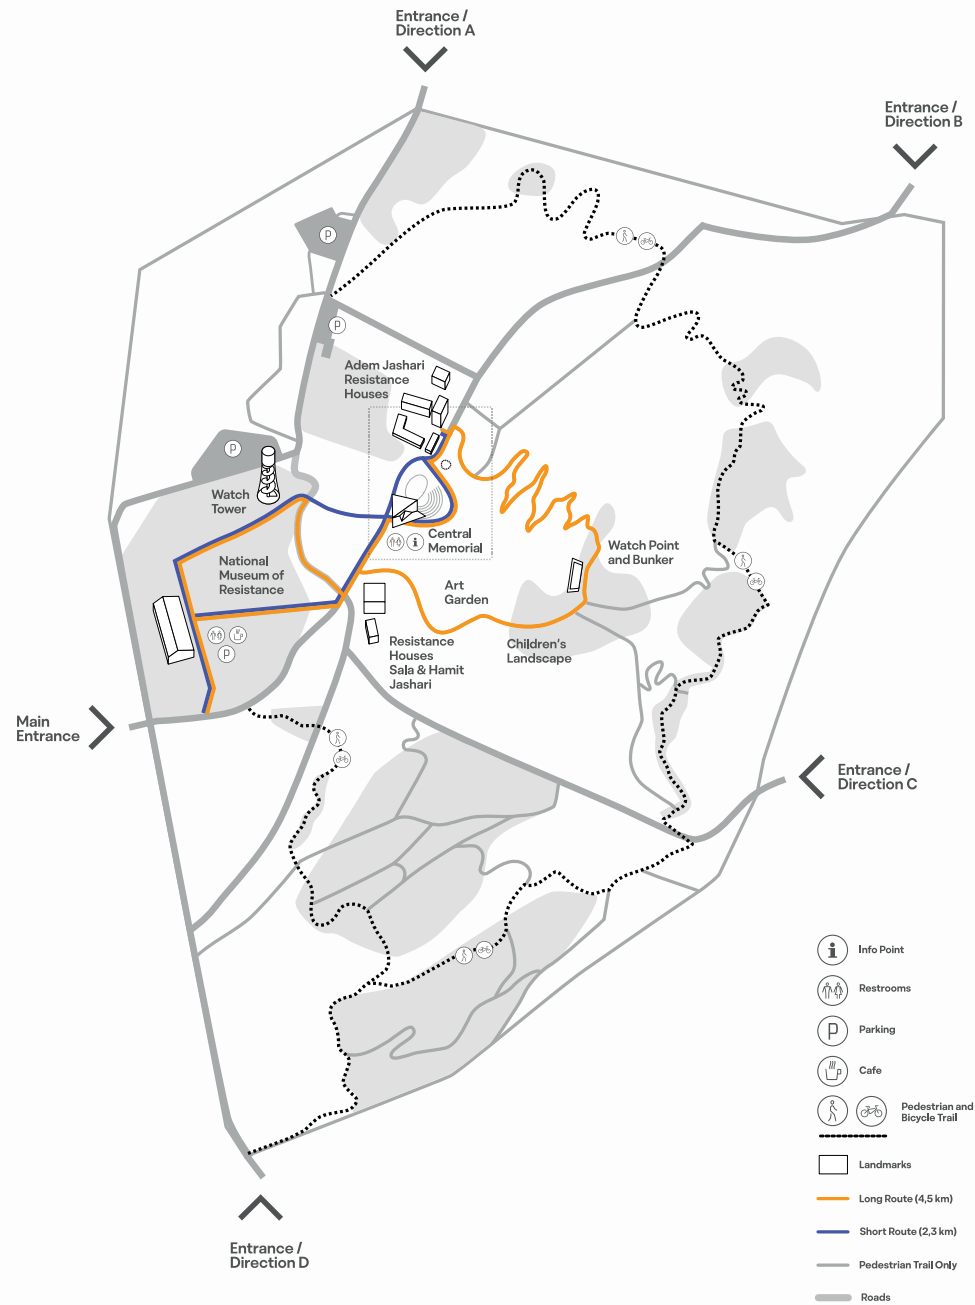

Class project of a brochure on the origin of writing and the disconnect between heard and written language. It includes a custom font adaption of “Visible Speech”, a notation system of mouth sounds first proposed by Alexander Melville Bell.

It is a collaborative project with Lilly Drosch and Nico Weiler.

Rokko Meets Art 2023

Flyer and Instagram posts about an open call for an internship taking place in the context of the Rokko Meets Art festival 2023 at Mt. Rokko, north of Kobe, Japan.

cartography in use

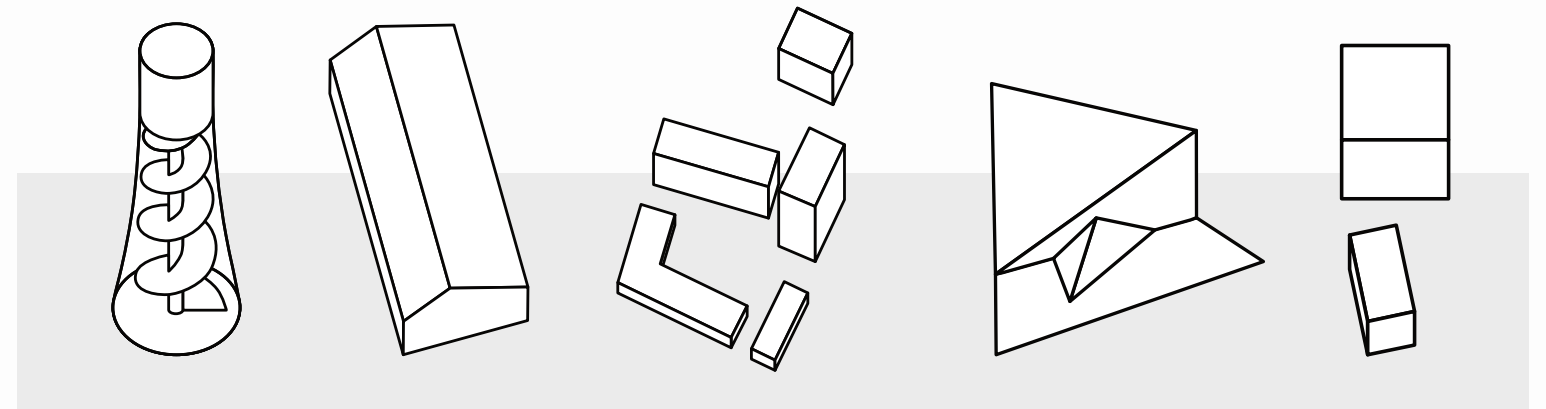

illustration of landmarks on site

AJMC Cartography

Concept design for wayfinding elements for the Adem Jashari Memorial, Kosovo, which is currently under construction. Produced during an internship at Moniteurs with pictograms by Hubert Jocham.

Space & Inter- action

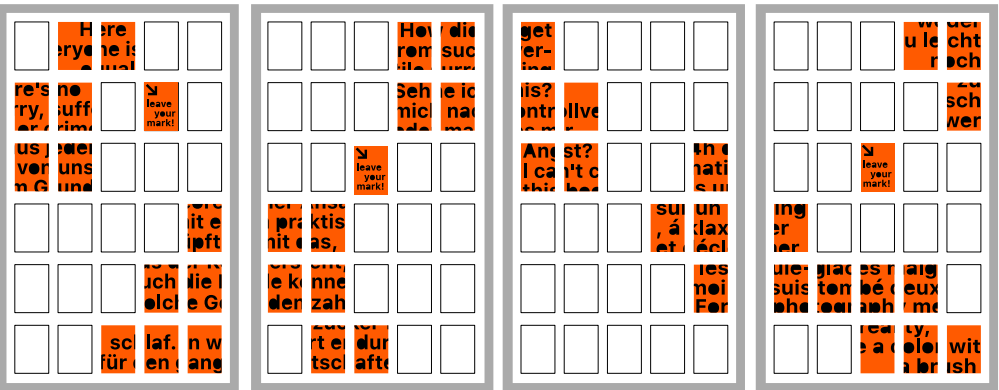

Plan B Book Fair

Following the cancellation of the Leipzig Book Fair of 2022, us students decided to organize an alternative event, showcasing the work of design-, book art- and illustration students of other german art schools.

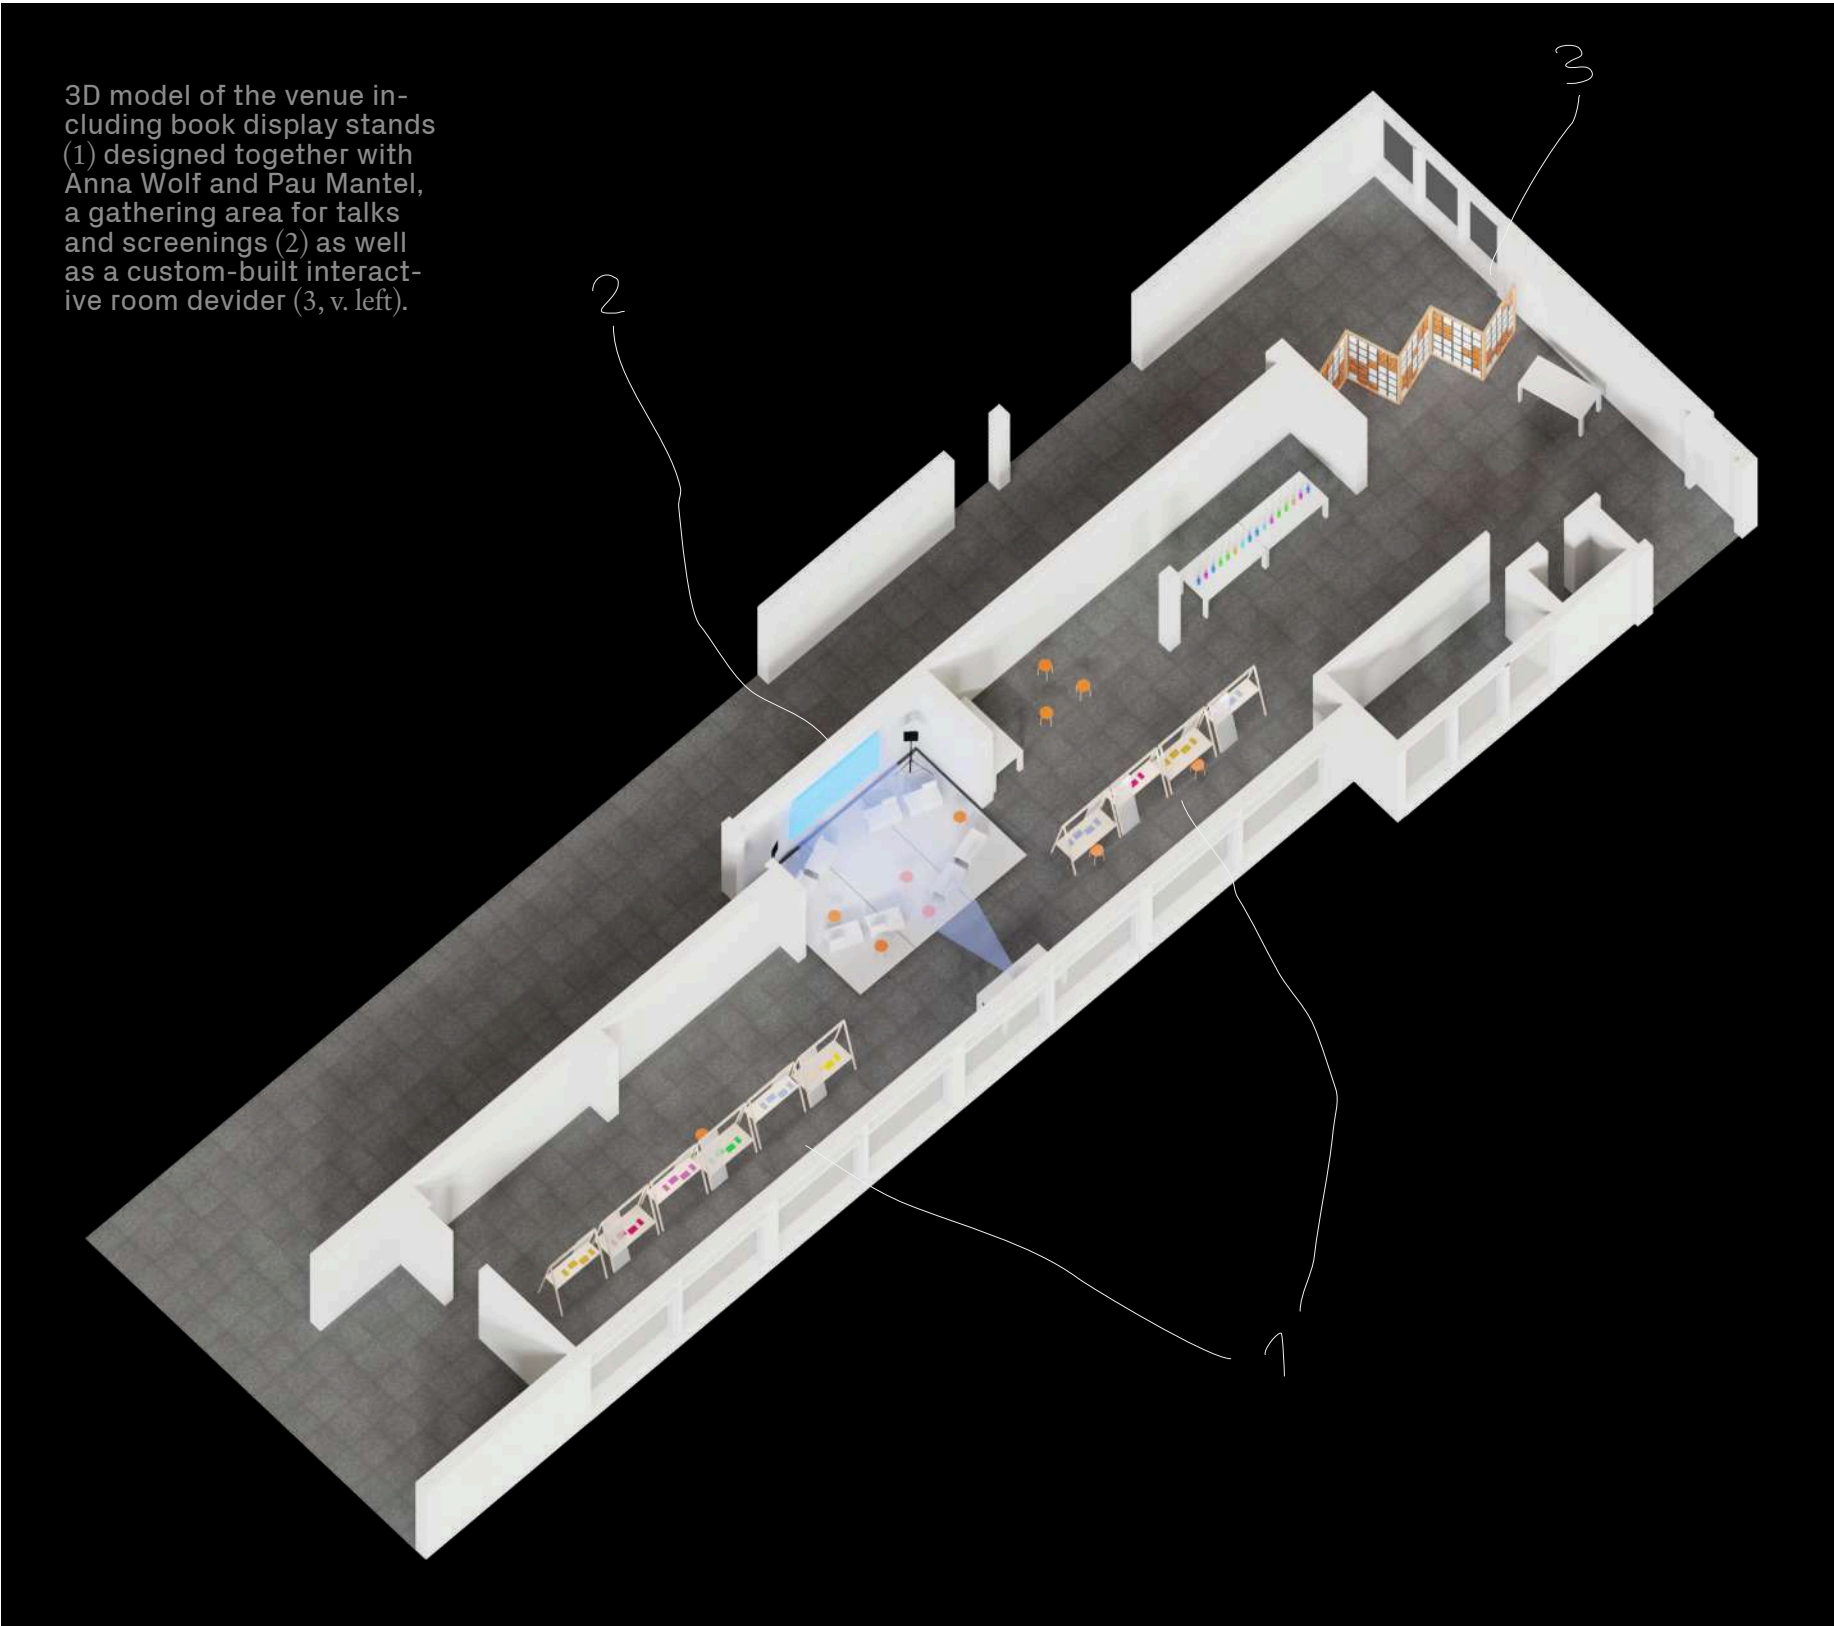

I took part in designing, modeling and building the exhibition modules and planned the spacial layout for the event.

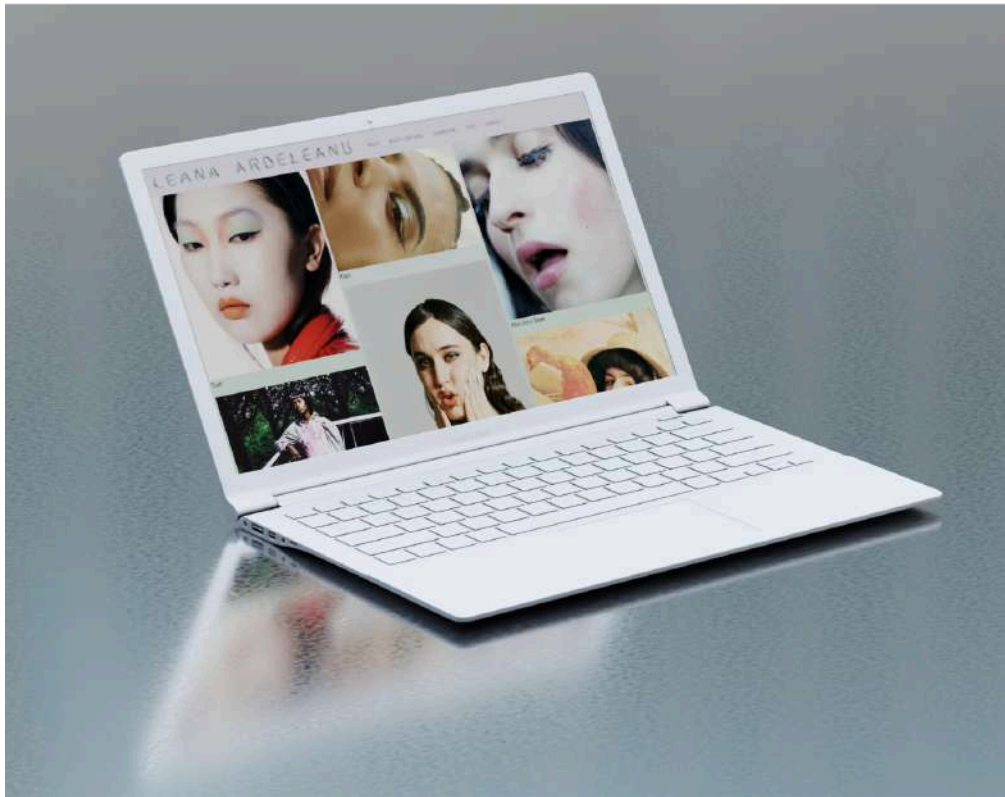

Exhibition views / 3D models

interactive room divider featuring quotes from the books on display

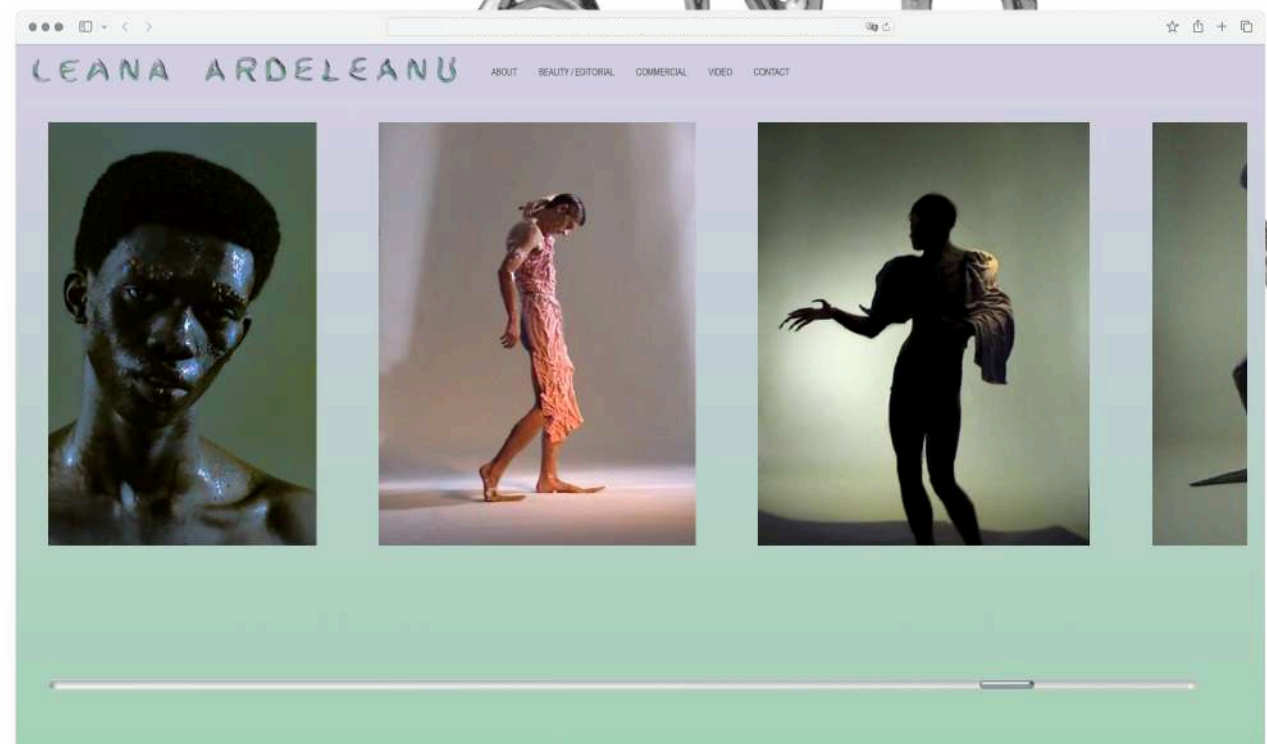

3D model of the venue including book display stands (1) designed together with Anna Wolf and Pau Mantel, a gathering area for talks and screenings (2) as well as a custom-built interactive room divider (3, v. left).

Leana Ardeleanu (2020-24)

A portfolio-website, logo and splash screen animation for Berlin based make-up artist Leana Ardeleanu.

installation view

Wind Harp

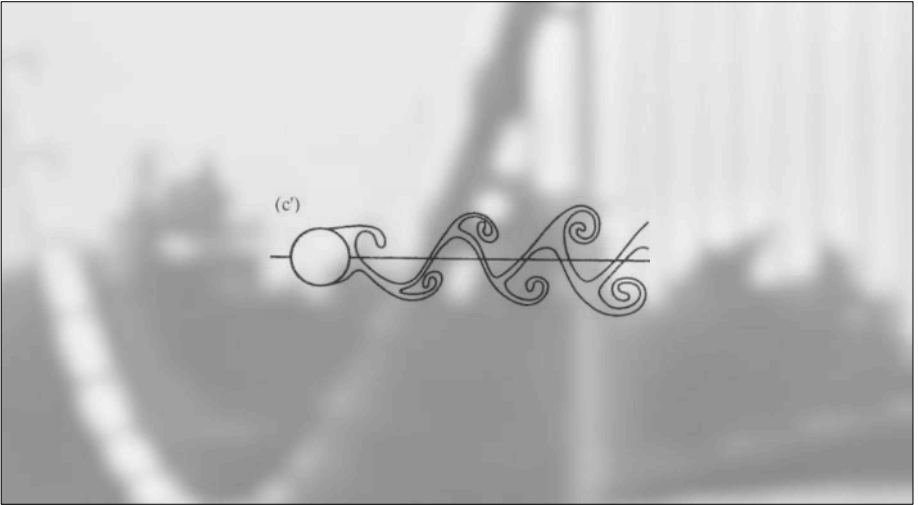

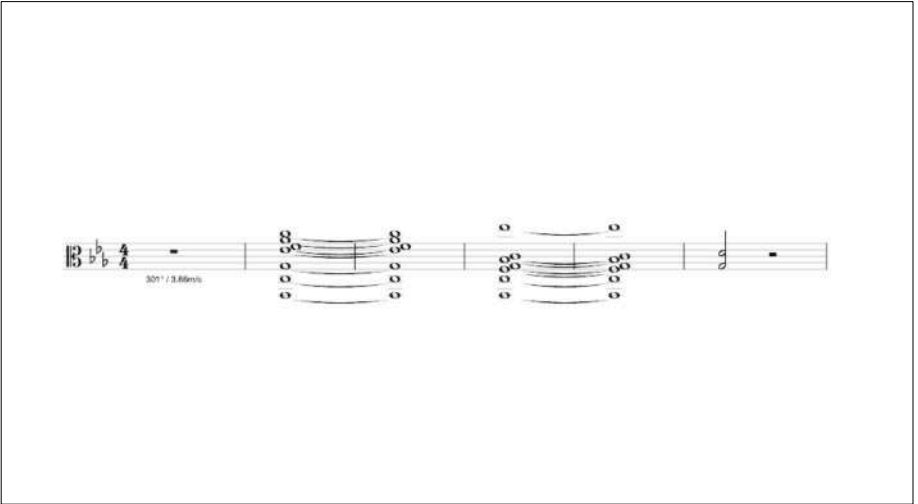

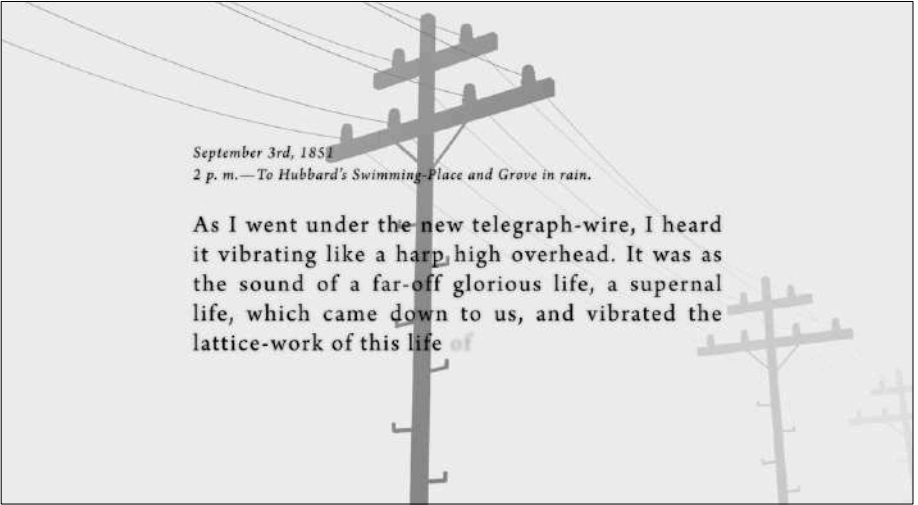

This video and sound installation traces the history of the aeolian harp, an instrument played by the wind, dating back to the 18th century, when it epitomized romantic ideals of poetic introspection and nature mysticism.

A program collecting realtime wind data from a weather station generatively produces sheet music that is performed on a concert harp. From another speaker, we hear a voice actor reading from the diary of Henry David Thoreau, likening the telegraph wires of the

1850s to harps played by the wind. A third screen shows footage from the 1940 collapse of the Tacoma Narrows Bridge, which broke down due to the same physical phenomenon that makes aeolian harps resonate.

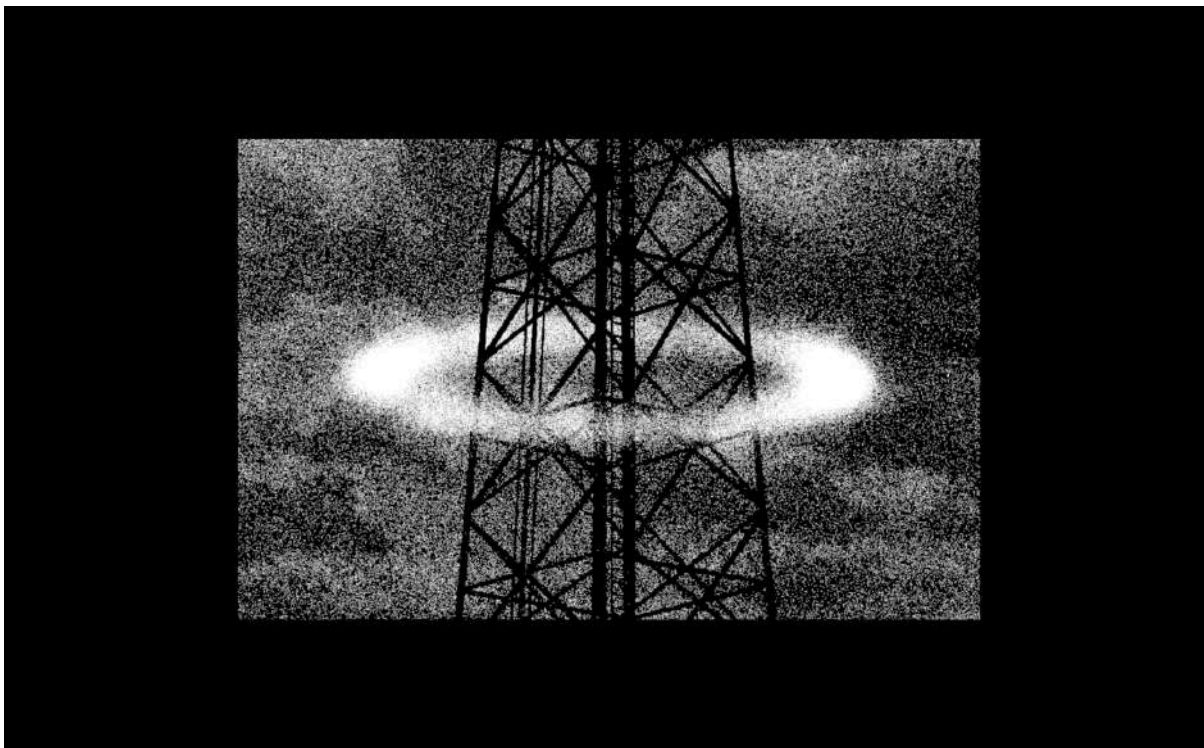

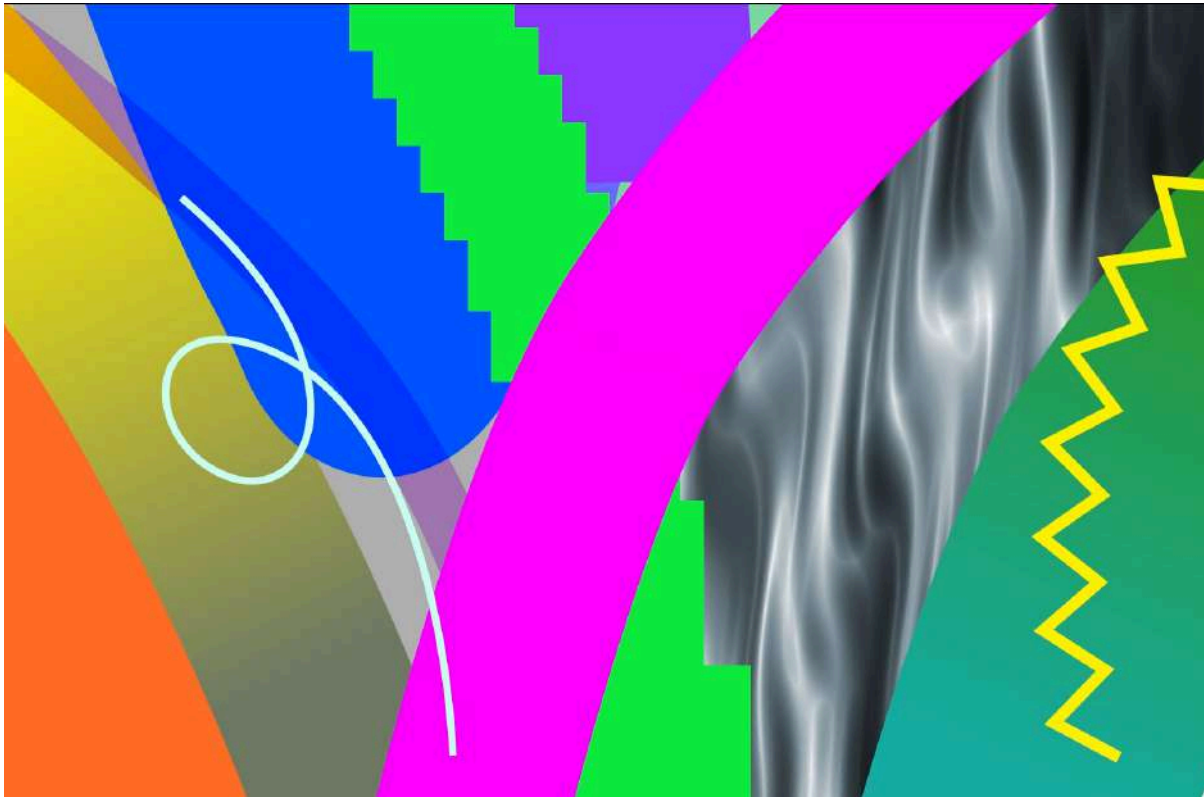

Together, they trace the history and our understanding of (in)voluntary interactions between human infrastructure and nature over the span of three centuries.

Screen Memory

Screen Memories are a Freudian concept, referring to memories which lay on top of and thereby efface other, more formative and potentially traumatic ones. However, this term could also be read differently - screen memories as memories of screens, or by means of screens.

This two channel animation investigates the role of screens in processes of remembering, forgetting and missing. Multiple narratives surrounding themes of loss, Greek mythology, language history and cinema are interwoven to depict both personal and collective forms of screen memories, and their potential to both destabilize and create new meaning.

simulation stills

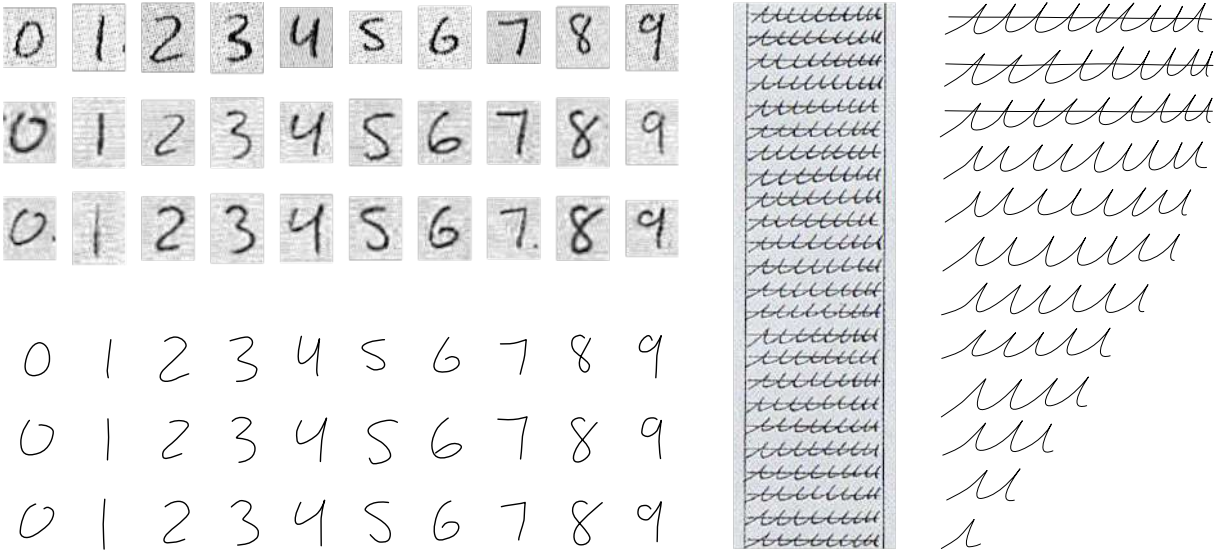

Bells

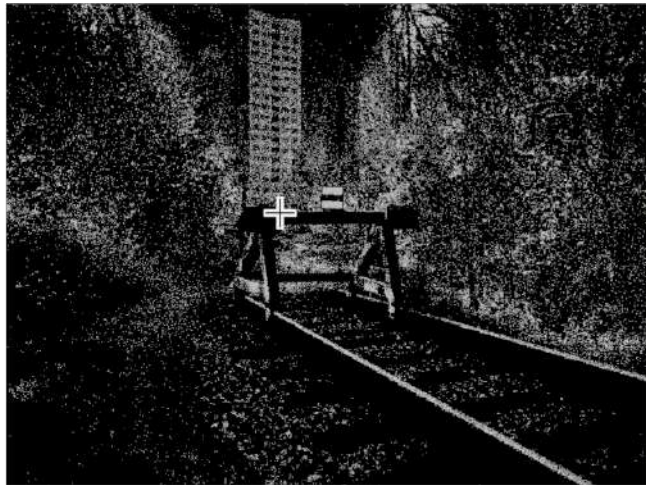

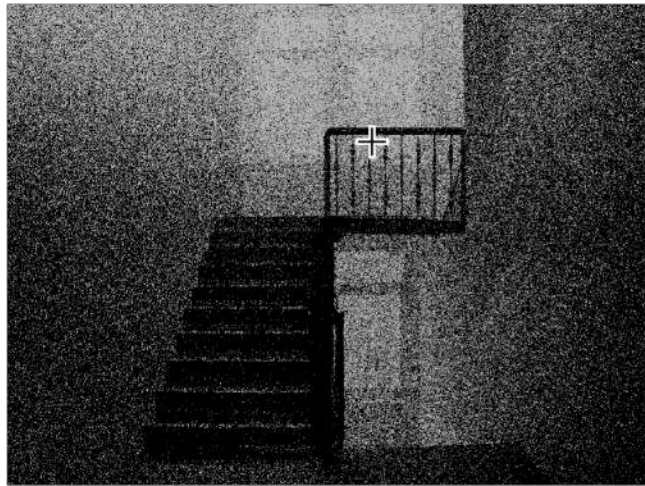

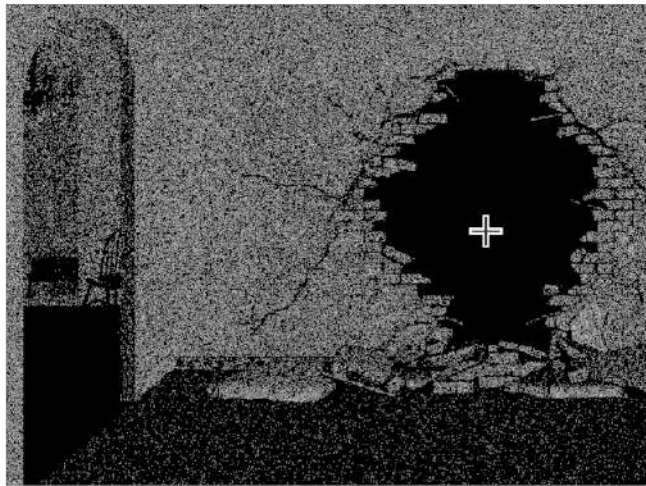

A two screen video installation, rendered in realtime, which links the numerology of the late conceptual artist Hanne Darboven to the history of walking rituals and simulations as a way of performing and keeping track of time.

One screen depicts a circular lantern procession, the other an algorithm which calculates and graphically depicts a new value for each date in the calendar, digitally extending Darboven's work into the next century. Together, they reflect on historiography, bureaucratic systems and ritualized structures of time.

digitalized and animated handwriting of Hanne Darboven

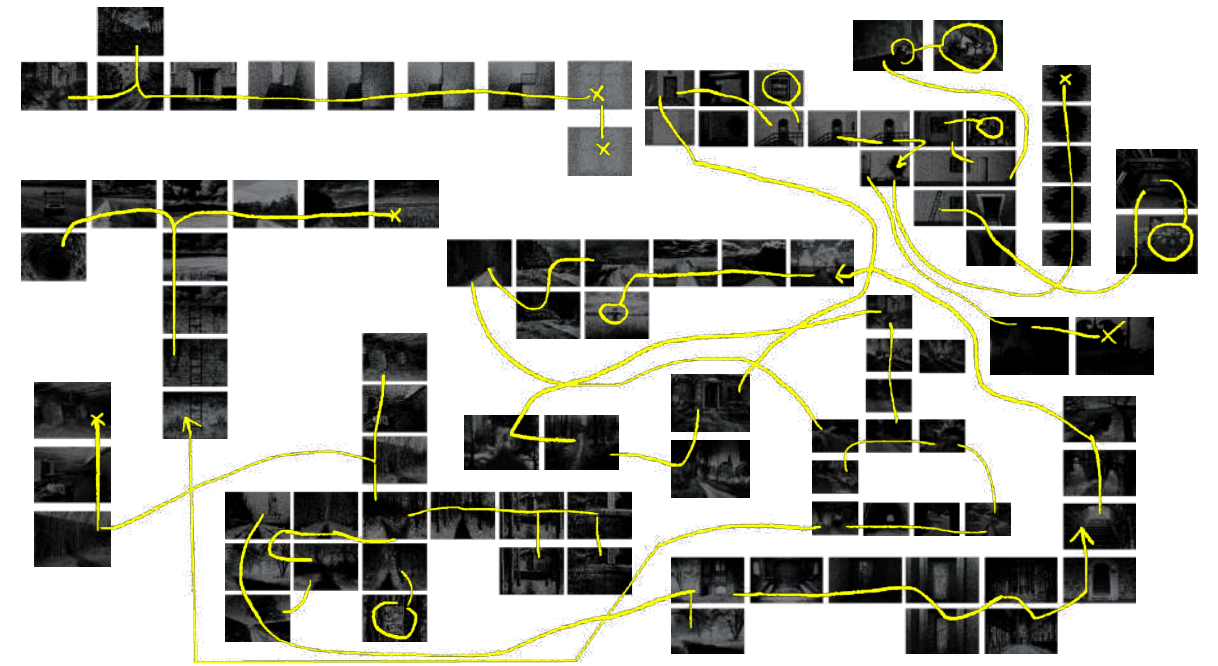

video stills

Glare

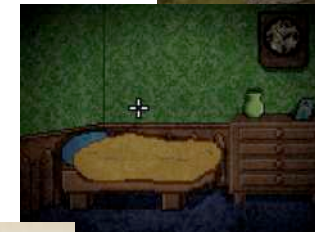

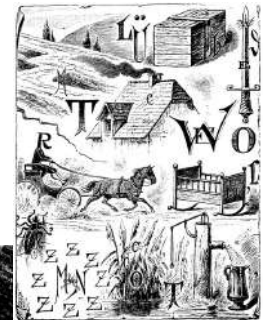

A 13-minute animation made during the CTR Substructured Loss residency Berlin. It follows an anonymous player through the ominous world of an imaginary point-and-click video game as it slowly untethers, blurring the lines between early 2000s online image culture, rebuses and photographic documentation of the Märkisches Viertel locality in the north of Berlin.

It is loosely based on an essay by Goran Vranesevic, linking point-and-click games to image puzzles and psychological processes of interpreting the world by way of pointing (Deuten) and aims to create a hybrid world between my real life and on-line realities while growing up. Glare was shown as part of the exhibition Of Lines and Familiar Thresholds in 2019.

An excerpt of the video can be found [here →](#)
